**INGREDIENTS**

Each ingredient must be named in accordance with the names and definitions adopted by the Association of American Feed Control Officials. This includes trace minerals and vitamins.

**FEEDING DIRECTIONS**

Administer as a top dress supplement or mix into the daily ration to provide 22.7 mg decoquinatate per 100 lb of body weight per day and 1 g chlortetracycline per 100 lb body weight/day for not more than 5 days. \*\* pounds of this supplement will medicate 100 lbs of body weight. If top-dressed, spread uniformly on top of ration and allow sufficient space so that all cattle can eat at the same time. When it is fully consumed, resume feeding 22.7 mg decoquinatate per 100 lb of body weight/day for a total of 28 days to prevent coccidiosis.

Caution: Bentonite should not be used in decoquinatate feeds.

Warning: No withdrawal period is required. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal.  
^ Do not feed to animals producing milk for food.
