

**DCX + Chlortetracycline-DERA Type B Cattle Feed Medicated  
Type B Medicated Feed  
(decoquinatate and chlortetracycline Type B medicated feed)**

**Caution:** Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

Calves, beef and non-lactating dairy cattle. For the prevention of coccidiosis caused by *Eimeria bovis* and *E. zuernii*; for treatment of bacterial enteritis caused by *Escherichia coli* and bacterial pneumonia caused by *Pasteurella multocida* organisms susceptible to chlortetracycline.

**ACTIVE DRUG INGREDIENTS\***

Decoquinatate<sup>a</sup> ..... 535.8 to 1818 g/ton  
Chlortetracycline<sup>b</sup> (as hydrochloride) ..... 20,000 to 80,000 g/ton

**GUARANTEED ANALYSIS**

Crude protein, not less than ..... %  
Crude fat, not less than ..... %  
Crude fiber, not more than ..... %

Sodium<sup>2</sup>, not more than ..... %

<sup>1</sup>If added.

<sup>2</sup>Shall be guaranteed only when total sodium exceeds that furnished by the maximum salt guarantee.

**INGREDIENTS**

Each ingredient must be named in accordance with the names and definitions adopted by the Association of American Feed Control Officials. This includes trace minerals and vitamins.

**MIXING DIRECTIONS**

In order to treat cattle for bacterial enteritis and/or pneumonia while preventing coccidiosis, mix this Type B medicated feed with non-medicated feed ingredients to manufacture one ton of complete cattle feed containing 12.9 to 90.8 grams decoquinatate and 500 to 4000 grams chlortetracycline, or a Type C medicated supplement containing 90.9 to 535.7 grams decoquinatate and 4000 to 20,000 grams chlortetracycline. The resulting Type C medicated feed should be fed at a rate to provide 1g chlortetracycline per 100 lb body weight/day and 22.7 mg decoquinatate per 100 lb of body weight/day daily for not more than 5 days. If top-dressed, spread uniformly on top of ration and allow sufficient space so that all cattle can eat at the same time. When this Type C medicated feed is fully consumed, resume feeding 22.7 mg decoquinatate per 100 lb of body weight/day for a total of 28 days to prevent coccidiosis. The following table provides examples of mixing rates.

Type B, grams/ton		Lbs Type B Per Ton of Feed	Lbs. Non-Medicated Feed Per Ton	Type C, grams/ton	
Decoquinatate	CTC			Decoquinatate	CTC
568	25,000	80	1920	22.7	1000
1136	50,000	40	1960	22.7	1000
1136	50,000	400	1600	227	10,000
1818	80,000	250	1750	227	10,000

**Caution**

Bentonite should not be used in decoquinatate feeds.

**Warning:** No withdrawal period is required. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. Do not feed to animals producing milk for food.
